Expanded Polystyrene

This is an industrial building system comprised of Expanded Polystyrene sheets sandwiched in between high tensile galvanized steel meshes. The EPS panels help you save up to 30% on the total construction cost and up to 50% of construction time. These panels are manufactured locally at our factory in Mavoko, Machakos County.

Advantages
- Cost effective
- Remarkable strength and durability
- Sound proof
- Fire resistant
- Improved thermal insulation
- Flexible in design
- Light weight
